#### **SPECIFIC COMMENTS TO AUTHORS**

Dear Authors, this an interesting case presenting the complexity of differential diagnosis in bleeding intracranial malignancies. The extensive diagnostic work-out of your case and intellectual background support the conclusion that brain tumors may be misdiagnosed if covered by hemorrhage and characteristics of perihematoma edema may lead to differential diagnosis. In order to optimize the grammatical and structural quality of your paper I suggest the revision by a native English speaker. Best Regards

### **SPECIFIC COMMENTS TO AUTHORS**

Specific comments to authors: 1. English editing is needed through all the manuscript 2. The authors must define each abbreviation before its first use in the text 3. Abstract: The authors should elaborate a short coherent abstract respecting the order of CARE checklist: Don't separate sentences with titles (Patient concerns, Interventions, Diagnosis..) 4. Key words: use MeSH terms 5. Introduction: References should be reordered The years of these percentages must be indicated: incidence.. 3.7 to 7.2%... Define the abbreviation of CT 6. Case presentation: Define the abbreviation of MRI 7. The authors should respect this order to describe the case: Patient information including past history / Clinical Findings/ Diagnostic Assessment/ Therapeutic Intervention/ Follow-up and Outcomes 8. Assessing the case presentation objectively avoids emotions: Unfortunately! 9. Conclusion: to avoid repetition , the author should elaborate the "take-away" lessons of this case report in a one paragraph conclusion

## SPECIFIC COMMENTS TO AUTHORS

. BACKGROUND: We hereby report a case ... / Did you mean Herein, we report ...? .  
In the CASE SUMMARY: - the authors should respect this order to describe the case: 1/  
Patient information including past history 2/ Clinical Findings 3/Diagnostic  
Assessment 4/Therapeutic Intervention 5/ Follow-up and Outcomes - Intracerebral  
hemorrhage may be the initial symptom of .... ? in this section, you should just describe  
the case - Key Words : use capital letters - Main points should come after the conclusion  
and avoid repetition in this section . Case presentation: -We present a 14-year-old  
patient with a history of tumor resection surgery in Shanghai in 1996.... -I think you  
should delete this sentence: Only the summary report at discharge is currently available .  
There are 2 sections of 'case presentation' ? The authors should elaborate a case  
presentation respecting the order of CARE checklist: Don't separate sentences with titles
