

## PEER-REVIEW REPORT

**Name of journal:** *World Journal of Clinical Cases*

**Manuscript NO:** 88298

**Title:** Inetetamab combined with pyrotinib and chemotherapy in the treatment of breast cancer brain metastasis: A case report

**Provenance and peer review:** Unsolicited Manuscript; Externally peer reviewed

**Peer-review model:** Single blind

**Reviewer's code:** 06075083

**Position:** Peer Reviewer

**Academic degree:** MD, PhD

**Professional title:** Assistant Professor, Researcher

**Reviewer's Country/Territory:** India

**Author's Country/Territory:** China

**Manuscript submission date:** 2023-10-26

**Reviewer chosen by:** AI Technique

**Reviewer accepted review:** 2023-10-27 09:18

**Reviewer performed review:** 2023-11-07 09:41

## SPECIFIC COMMENTS TO AUTHORS

In this study, the authors reported a case of patient with complex breast cancer brain metastasis. The patient underwent brain metastasis resection and received macromolecular mAbs, small molecule TKIs, combination chemotherapeutic drugs, and radiation therapy. The overall condition of the patient was controlled and stabilized. The authors propose that combined macromolecule and small molecule chemotherapy and radiotherapy can provide a new option for the treatment of patients with breast cancer brain metastases. MRI of the brain of the patient showed that the tumor size was stable, and all the tumor indicators were within the normal range. The case is well described, and discussed. Please make an editing to the manuscript. Some minor language polishing should be corrected before the acceptance.
