Peer-reviewer statements	Peer-Review: [Y] Anonymous [] Onymous Conflicts-of-Interest: [] Yes [Y] No

SPECIFIC COMMENTS TO AUTHORS

Author describes NOTES for retrieval of guide wire from a patient of decompensated cirrhosis which is a rare phenomanan. This manuscript shows expanding use of NOTES. Name of guide wire and procedures during which guide wire slided into peritoneal cavity is not mentioned. What is the reason guidewire were not removed during laparotomy at initial procedures. Laproscopy is far more available and cost effective. Is NOTES safe indication in decompensated cirrhotics? Leaving a foreign body in body cavity invites for medicolegal issues.
