

PEER-REVIEW REPORT

Name of journal: *World Journal of Clinical Cases*

Manuscript NO: 89510

Title: Urinary metabolic profiles during Helicobacter pylori eradication in chronic gastritis

Provenance and peer review: Unsolicited Manuscript; Externally peer reviewed

Peer-review model: Single blind

Reviewer's code: 03259131

Position: Peer Reviewer

Academic degree: MD, PhD

Professional title: Associate Professor, Surgeon, Surgical Oncologist

Reviewer's Country/Territory: Japan

Author's Country/Territory: China

Manuscript submission date: 2023-11-03

Reviewer chosen by: Jia-Ru Fan

Reviewer accepted review: 2023-11-25 05:16

Reviewer performed review: 2023-12-02 08:11

SPECIFIC COMMENTS TO AUTHORS

Review comments WJG-89510, reviewer. It is my great honour and pleasure to review such an interesting manuscript. The authors tried to prove that a new perspective for exploring the significance of urinary metabolites in evaluating the treatment and prognosis of H. pylori-positive chronic gastritis patients. This is an experimental study by analyzing urinary metabolic profiles. There are some limitations in this study as below; 1. The sample size is small. 2. There is no control. This is important. The study design, In order to prove "Urinary metabolic profiles during Helicobacter pylori eradication in chronic gastritis", Helicobacter pylori positive/negative, chronic gastritis positive/negative and administration of eradication medicine positive/negative should be examined. Basically, this study will contribute a kind of frontier works. I respect authors' much labor. Unfortunately, there is no control groups. Of course, this topic is interesting and important. However, the present manuscript needs some revisions for the publication of "World Journal of Gastroenterology".
