SPECIFIC COMMENTS TO AUTHORS

The topic of the work is very interesting, current and of great clinical importance. However, the title must be changed and replaced by: "A Case Report : Advanced cervix cancer patients with chemotherapy induced grade IV myelosuppression achieved complete remission with cadonilimab monotherapy" not to be confused with the neck (cervical region). the same should be done in the abstract

SPECIFIC COMMENTS TO AUTHORS

Title: The title needs to be restructured. **Abstract:** Few sentences in the abstract need to be restructured. Please make the abstract completely structured or non-structured as per the guidelines of the journal. **Key Words:** Please omit 'case report' keyword from the keywords list and add more relevant keywords if any. **Core tip:** Please add 'Core tip'. **Introduction:** Please don't use complete terminology multiple times, instead use appropriate abbreviations subsequently. **Case Description:** 1. Please clarify whether the initial treatments (June 2021 and Nov 2021) were performed in the same hospital where the authors are affiliated to or in some other hospital, as the initial sentence creates confusion regarding the same. 2. This paragraph 'Considering the patient's young age and strong will to survive, she expressed a strong desire to be transferred to our hospital for further treatment. Therefore, both the patient and her family members were successfully transferred to our hospital in July 2022' is purposeless and needs to be

omitted. 3. This paragraph 'The patient suffered an accidental fall in August 2022, resulting in a fracture of the right intertrochanteric femur and a suspected fracture of the right subpubic branch. The orthopedic department performed surgical intervention to address the right intertrochanteric femoral fracture, and the postoperative recovery was satisfactory' may be omitted if not relevant to the context of this case report. 4. Please confirm whether the date 'On August 27, 2020' as mentioned is correct or not. Discussion: Please mention whether the patient had experienced any adverse effect during cadonilimab monotherapy. Conclusion: Please make conclusion a paragraph under separate sub-heading. Figures: 1. Please reduce the font size of Texts in Figure A as appropriate. 2. Please provide elaborated figure legend for Figure 3. Other Comments: 1. The authors need to use more scientific terminologies as appropriate throughout the article. 2. The authors need to avoid use of different text fonts and size randomly throughout the article. The article needs to be revised accordingly with appropriate text font and size as per the journal guidelines. 3. Grammatical and sentence construction errors need to be rectified appropriately throughout the article.
