COMMENTS TO AUTHORS

This is an interesting case report. The photographs are descriptive. please discuss any differential diagnosis for this bilaterally symmetrical occurrence. Was there an associated lid pathology?

COMMENTS TO AUTHORS

Interesting case report. I wonder if any differences between dellen formation in Pterygium and shunt implant?

COMMENTS TO AUTHORS

This manuscript entitled “Dellen-like keratopathy associated with glaucoma drainage devices” was to report the first case of dellen-like keratopathy with superior corneal thinning. It is an interesting study and well written and discussion. But I think it belongs to the sequela after trabeculectomy, except this patient also had shunt surgery. Besides, I hope authors have to clarify whether patient have dry eye or lid problem or systemic collagen disease.
