COMMENTS TO AUTHORS

Excellent really interesting case highlighting the potential benefits of the tissue sensing properties of the HARMONIC ACE?+. Looking forward to using the equipment for head and neck surgery. I have made two suggestions with respect to grammar and these are highlighted in the attachment.

COMMENTS TO AUTHORS

Authors describe a case of a giant gastric GIST respected by HARMONIC ACE+ (as stated in the title). The manuscript is well written. Gastric GISTs are very well known entity. When describing microscopic findings, authors should list the immunostains that were positive/negative in order to confirm the diagnosis. Subtype of GIST (spindle cell/epithelioid) and microscopic images (H&E, immuno) could also be included in the text. Novelty in this manuscript is the usage of the new generation ultrasonic scalpel device. This could help other surgeons to encourage them to use the device in the similar circumstances.
