### COMMENTS TO AUTHORS

This is a well-written, straight forward summary of our knowledge of gallbladder cancer. It does not add to our current knowledge, rather summarized what is and what is not known about this tumor. It also points out areas of controversy and provides references for more in depth investigation of this problem for those who wish to explore this further. The manuscript is essentially the same as would be found in a text book as a part of a chapter on gallbladder disease. Publication depends on your policy for including summary articles such as this in your journal versus those that provide new data and concepts.

### COMMENTS TO AUTHORS

This is a well-written, well-organized review paper dealing with clinical and pathological approach of gallbladder cancer. The surgical strategies were mentioned on the first part of the paper and after that the pathological approach was noted. Minor comment The author stated lymph vessel invasion, LN metastasis, and recurrences based on their T1b series from line 20 of P5. Citations should be given at the sentence.
