COMMENTS TO AUTHORS

1.The case-report is interesting and so is the complication and super infection 2.It needs some improvement of the English maybe a native english speaker. 3.The description of the surgery esp. the kind of stitchers should be ommitted. 3. two potographes are enough

COMMENTS TO AUTHORS

I read the manuscript named "Gastric trichobezoar with perforated peptic ulcer and Candida Glabrata infection". (Manuscript Number: 12392) and my recommendations are as follows. This manuscript was well-written and documented. Topic has been discussed with all aspects. This study is clearly presented. Also, this manuscript gives additional new knowledge to the literature. I think that this manuscript is suitable and worth to be published in World Journal of Clinical Cases. Ali Coskun, MD General Surgeon Izmir Training and Research Hospital, Izmir, Turkey
