COMMENTS TO AUTHORS

Few comments: Page 2: Core tip: second sentence please rephrase or edit "featrue" to "future". Page 4: Line 17: Furthermore, if once the left ventriculotomy "were" performed, future'... may be altered to "was".

COMMENTS TO AUTHORS

This case report presented a case of successful surgical removal of a large mobile left ventricular thrombus via left atriotomy without deteriorating LV function. Although this is a hopeful strategy, this report encompasses some obscure points. 1) Please show concrete EF after the surgery. 2) Please comment on any complications after the open surgery, such as bleeding which may lead to cardiac tamponade, ventricular arrhythmias, Atrial arrhythmias, e.g., PSVT atrial fibrillation.

COMMENTS TO AUTHORS

This is an interesting case that I believe deserves to be published. I would like the authors to mention potential limitations of the technique they describe besides the limited room for maneuvering of the thrombus.
