## COMMENTS TO AUTHORS

A histopathology of lymphoma in this case report must be included.

### COMMENTS TO AUTHORS

Dear authors, the article is well written and the case is really remarkable. On the other hand, it's really difficult to understand the relationship between PCL and gallbladder attack. If it is only an incidental finding occurred by chance, I don't think it could be useful for researcher and physicians. The management of PCL is well described, but it should not be the main target of your paper. I think that your single experience may be useful to write a more interesting review on PLC management.
