COMMENTS TO AUTHORS

Thank you for giving me the chance to review this interesting case report. This article presented with the case report of a pancreatic tuberculosis which mimicking pancreatic head carcinoma in an immunocompetent host. After anti-tuberculin therapy, the patient recovered soon. This report is interesting and informative that provides useful information of rare disease as a cause of pancreatic masses and obstructive jaundice. However, it is better to show pathological findings revealing pancreatic tuberculosis. In conclusion, I recommend this article to be accepted after minor revision.

COMMENTS TO AUTHORS

Dear colleague You have to make the past history of the patient more clear to rule out any immunodeficiency cause

COMMENTS TO AUTHORS

Title: A PROGRESSIVE PANCREATIC TUBERCOLOSIS MIMICKING PANCREATIC HEAD CARCINOMA DURING ANTI-TUBERCOLOSIS THERAPY. In this paper the Authors describe a rare case of a pancreatic tuberculosis in an immunocompetent man. In the explanation of the case report, there are not described the HIV serology and the dosage of the lymphocyte subpopulations. However, according my opinion, the paper is not well written though it deserves to be published in this journal because it could be of interest for the readers. A mother tong revision is necessary. However, other some minor revisions are necessary: 1. Core tip: Please write a summary of less than 100 words to outline the most innovative and important arguments and core contents in your paper to attract readers. 2. References – in the main text, the references should be mentioned in square brackets in superscript – not in round brackets; in the list, the name of the first author should be typed in bold-faced letters same as for the volume of the journal; included in square brackets. In case of mention of both PMID and DOI, PMID should be mentioned before DOI. 3. Figure: according my opinion, this figure represents an abdominal-CT performed without contrast agent. It would be possible to replace this with another with contrast agent?
