		<input type="checkbox"/> No records	

COMMENTS TO AUTHORS

This is a short case report showing a pediatric patient with perforating jejunal diverticulum. The case is rare and may be worth publication. However, more photographic figures are required showing the macroscopic features of ruptured diverticulum and the view of jejunum during the operation.

COMMENTS TO AUTHORS

This is an interesting case on Meckel's diverticulum-like lesion in jejunum complicated to perforation.

1. How was the ileum? There was one report on double Meckel's diverticulum located into jejunum and ileum (Minerva Gastroenterol Dietol. 2006 Jun;52(2):225-31).
