### COMMENTS TO AUTHORS

This is a well written review about the management of patients with stable coronary artery disease. I would suggest the usage of the authors of the term "single- & multi- vessel disease" instead of "uni- & multi- arterial". Moreover, it would be advisable to add a paragraph concerning the ESC guidelines about stable coronary artery disease management. Finally, authors should mention some data about the pharmacologic treatment options, regarding especially new compounds such as ranolazine and ivabradine.
