COMMENTS TO AUTHORS

This manuscript titled "Vitamin K and hepatocellular carcinoma: The basic and clinic" overviewed the metabolism of Vitamin K, stated the involvement of VK in cell, tumor biology and general health, stated the clinical aspects of VK in liver cancer, and in the last expected the future directions of the anti-HCC effects of VK2. I think is a nice review about Vitamin K and hepatocellular carcinoma. However, there are some grammatical mistakes and formation need to be improved.

COMMENTS TO AUTHORS

The authors should review more findings in tumor biology of vitamin K in recent years. And more content of vitamin K derivatives administration in HCC should be added.

COMMENTS TO AUTHORS

Vitamin K (VK) is a well-known lipid-soluble vitamin that includes two natural types: vitamin K1 (VK1) and vitamin K2 (VK2), and synthetic types, known as vitamins K3 (VK3), K4, and K5. VK1, also known as phylloquinone. Relationship between Vit K and newborn should be involved.
