### COMMENTS TO AUTHORS

It's important, in the conclusions, to revise the criteria of diagnosis, up to date about the therapy and modalities for the follow-up.

### COMMENTS TO AUTHORS

Review for the manuscript No: 26462 Lymphocytic Esophagitis: report of three cases and review of the literature published by Jideh B et al. General comments: This is a nice and well-structured manuscript describing the new entity among esophageal diseases. In addition there are descriptions of three patients with probable lymphocytic esophagitis. Although interesting, the authors did not prepare both figures, so they should not be included in the publication. I suggest that they include their own material, from one of the described patients. The topic is very interesting for readers, so with some corrections mentioned earlier, I think you should accept the manuscript for publication.

### COMMENTS TO AUTHORS

Nice review. In relation to management have other locally acting steroids such as budesonide or even systemic steroids been considered. Any association with microscopic/lymphocytic colitis?
