		<input type="checkbox"/> The same title	
		<input type="checkbox"/> Duplicate publication	
		<input type="checkbox"/> Plagiarism	
		[Y] No	

## COMMENTS TO AUTHORS

In this study the authors report a case of a man with a metabolic syndrome story. The patient got a dual treatment with glucocorticoid and tamoxifen which evolved through a lymphoma. This case study is interesting and deserve publication I suggest the authors open the discussion citing supplementary references related to the importance of sterol metabolism as tamoxifen alternative mechanism of action that could explain these side effects (see for example Silvente-Poirot et al, Science, 2014)

## COMMENTS TO AUTHORS

This is an interesting case report. 1. In all the Figures, it would be helpful to indicate with arrows the features being referred to. 2. Minor typos eg laparotomy, positeron, etc require correction.
