### COMMENTS TO AUTHORS

The case is very interesting. However it is unclear why the proposal for ECT to be an alternative to apheresis and immunotherapy. Seems like this case supports adjunct or complementary therapy for non responders. Another aspect that is not clearly addressed that this patient received ECT before and after plasmapheresis. There are no comments or a theory if this could have an effect on the outcome of this patient. The authors make a great case advocating awareness for the disease, its diagnosis and treatment. This case report is a good contribution for treatment considerations.

### COMMENTS TO AUTHORS

Suggestions: Should the author : (1). typing the whole spelling of GP as general practitioner (GP) at page. 8. (2). Correct the "2 stones in weight "to Kg. or pounds (14 pounds = 1 stone) in the manuscript at page 8.
