### COMMENTS TO AUTHORS

This manuscript by Lingeshwar et al. is about Prosthodontic management of hemimandibulectomy patients to restore form and function. It is interesting and significant because of loss of function and esthetics in hemimandibulectomy patients as they might have an colossal effect in their physical and psychological well being. However, I have some concerns. 1. Introduction should be more detailed. 2. Some grammar errors should be corrected.

### COMMENTS TO AUTHORS

This is a well written manuscript exposing the experience of the Authors in such particular field. The follow up should include not only the esthetic aspects of surgery, but also the attention payed to trigeminal nerve stumps in order to avoid deafferentation pain sy seen in such cases. Minor language polishing.
