SPECIFIC COMMENTS TO AUTHORS

This is a case report of a patient with primary gastric choriocarcinoma with multilineage differentiation that has been rarely reported. A well-written report. 1) Macroscopic images of resected specimens should be shown. 2) Arrows would be helpful for readers

in Figure 1, as seen in Figure 2. 3) In the first paragraph of CASE REPORT, there is a sentence including 'no other tumors of the breast, ovaries...', despite male gender. 4) The levels of hCG in the blood and uterine, and serum AFP of this patient should be shown. 5) Table 1 is unnecessary.
