**SPECIFIC COMMENTS TO AUTHORS**

Interesting and relevant case - The main concern is how you explain the lung symptoms? Was it tuberculosis and fungal infection occurring at the same time? How can you prove it either way? If the lung involvement was also fungal then your case is not really special because it is not restricted to the lymph nodes -It is not really clear how you confirmed

### SPECIFIC COMMENTS TO AUTHORS

In the present study, authors describe a patient with mycosis, these are my comments:  
What was the physical environment of the patient? Were risk factors present? Why did the patient receive anti-tuberculosis treatment? Was there any test to diagnose it? Why did patient receive antibiotic treatment without any test to support it? Were
