SPECIFIC COMMENTS TO AUTHORS

The authors have presented their experience of managing renal artery stenosis caused by Takayasu disease with angioplastiy and deployment of drug-eluting stents. Although the number of patients in the case series consists of 5 female patients, the knowledge

shared is valuable to personnel involved in managing this group of patient. The word "ladies" should be replaced by "female patient" initially and by "patients" in subsequent sections. There are recent publications on Takayasu's disease involving renal arteries, which need to be included in the reference and older references be removed.

SPECIFIC COMMENTS TO AUTHORS

Abstract (113 words) is too short The presented 5 cases imply that they were diagnosed at the same time. It has to be clarified that TA is a rare disease and mention over how long these 5 cases were detected.
