|  |   |  | <input checked="" type="checkbox"/> No        |

### SPECIFIC COMMENTS TO AUTHORS

This is an interesting case report of a leiomyosarcoma of the stomach. Overall, this case

**https://**www.wjgnet.com

report is well written. I have some minor comments: 1) Prognostic data from the pathological examination of the excision specimen are not given. Was the margin negative? 2) What was the cause of death on the death certificate of the patient and what were the clinical data between resection and death. Is there any indication of metastasis to the lung. Normally, follow-up imaging is performed for local or distant recurrence. This should be discussed. 3) the follow-up data should be checked.

and it was very well described. In my opinion, this case report can be accepted for publication after a minor language editing. Congratulations!
