SPECIFIC COMMENTS TO AUTHORS

This manuscript reported 2 cases of PNET in young children. The authors described the case reports and literature review well. However, there are some points to be corrected in terms of style. 1. Case reports, Case 1 (page 3) 5 by 5 cm ---> 5 x 5 cm 2. Case

reports, Case 1 (page 3) and Fig. 1 musculus transversus abdominis and the
musculus obliquus internus abdominis Vs. abdominis obliquus
internus musculus and the abdominal transverse muscle 3. Page 4, line 2 high
nuclei and little cytoplasm ---> high nuclear cytoplasmic ratio 4. Page 4, line 2,3
give the full-terms for Syn, CgA 5. Page 4, line 11~14 The patient was followed up
with for 66 months with no relapse or metastatic disease, and currently attends school
and functions normally. No treatments followed the eight cycles of chemotherapy, and
the patient has survived for 66 months without progression. ---> The patient was
followed up with for 66 months with no relapse or metastatic disease, and currently
attends school and functions normally. No treatments followed the eight cycles of
chemotherapy.
