An interesting case report but something needs to be revise as below: 1. Reduce the number of citation less than 10 references as possible 2. Remove all of the citations greater than 10 to 20 years at least 3. Lacking of a conventional CXR PA view 4. Language revision such as sudder chest pain etc. (may change to sudden onset chest pain..)

This case report was interesting, but several issues listed below remained unclear. 1. The level of folate, Vit B12 and Vit B6 should be shown. 2. Body weight and height should be described. 3. Authors should mention or discuss whether the patient have the cause leading to Vit B12 deficiency. 4. Authors should describe more detail whether the patient had genetic or secondary coagulative disorder or not.
