### SPECIFIC COMMENTS TO AUTHORS

The current manuscript reported on two uncommon cases of ghost cell odontogenic carcinoma respectively occurred in maxilla and mandible and with literature review. The following point are suggested for further consideration. 1. The diganosis of ghost

cell odontogenic carcinoma heavily depends on histopathological evaluation; however, the authors lack to supply a fully description of the histopathological finding of the two cases. To my opinion, it needs to be added. 2. In the discussion section, the authors have provided the findings of immunohistochemical evaluation of ghost cell odontogenic carcinoma. However, no immunohistochemical evaluation has been supplied in the two cases. It needs to be included.

### SPECIFIC COMMENTS TO AUTHORS

The manuscript is well written. Because of rarity of this lesion such cases need to be documented. I recommend this manuscript for publication.

### SPECIFIC COMMENTS TO AUTHORS

The authors presented two cases of ghost cell odontogenic carcinoma. In general well written manuscript . The cases presentetions are very clear. I have a few minor comments and recomendations to improve the manuscript: (1) introduction „...is an

extremely rare odontogenic epithelial... „; (2) case 1 Teeth „11-12....“ ; (3) add the patient's orthopantomographic radiograph on follow up (case 1); (4) case 2 add the data about duration of painful swelling; (5) in discussion section the authors wrote: „both patients had impacted tooth“ – add those data in patient descriptions/presentations and figure legend for patient 2; (5) The figure 1 and figure 3 are too small. I suggest presenting orthopantomographic radiograph and CBCT image as separate figures.
