SPECIFIC COMMENTS TO AUTHORS

This is a very interesting case report with regard to the diagnosis and treatment of a rare disease. Nevertheless, major revisions are needed. 1. In the Introduction section the phrase "This orphan disease presents" should be replaced. Therapeutic approach should be also mentioned in the Introduction. The aim of the study should be re-written. 2. The

second section should be reduced in size. Only abnormal laboratory findings should be referred. Please clarify CT depiction. 3. The sections Final diagnosis and Treatment should be included in the second one. 4. The Discussion section should avoid information included in the Introduction. Therapeutic approach should be more commented. 5. Newly published articles should be included in the References section. 6. The number of figures should be reduced. 7. Grammatical errors should be corrected.

SPECIFIC COMMENTS TO AUTHORS

This is a very rare case of UCD presenting jaundice. This case seems worth for publishing, but some points are lacking unfortunately. 1. What was the preoperative diagnosis? It should be described in the manuscript. 2. Were there any invasion of the tumor to the bile duct? 3. LN metastasis might be a differential diagnosis, then several

imaging studies such as PET-CT, MRI or ERCP would be essential. What imaging studies did you choose other than dynamic CT and how was the findings? 4. To confirm pathological diagnosis preoperatively, EUS-FNA should be an option. What do you think? 5. The term duodenal ligament in the manuscript and abstract should be hepatoduodenal ligament.
