SPECIFIC COMMENTS TO AUTHORS

A very rare case was presented. The positive clinical outcome with their chemotherapy regimen may really be an alternative treatment.

SPECIFIC COMMENTS TO AUTHORS

Title: Term carcinosarcoma is inappropriate in this case. Rather this should be Carcinoma Ex pleomorphic Adenoma. **Abstract:** Satisfactory **Key words:** Malignant neoplasm of submandibular gland; Malignant pleomorphic adenoma; is repetition, need

to add more different words. Background: On the basis of clinical and histopathological details, this case seems to be Carcinoma Ex pleomorphic Adenoma. Term carcinosarcoma is misleading here, until source of origin of this cancer is confirmed. Histological diversity is unique character of Pleomorphic tumors, where this can show osseous tissue also. Previous treatment details; before recurrence is missing, and for any case physical examination findings are important should be highlighted. Discussion: Satisfactory Illustrations and tables: B: poorly differentiated carcinomas. C: spindle cell carcinoma. D: tumor bone. Marked words are inappropriate. References : (,) not require after journal. Otology, 2016, 130: S142-S149. [PMID: 27841127] Methods & Reporting: Good Quality of manuscript& presentation: Needs modifications. Ethical issues: Nil
