SPECIFIC COMMENTS TO AUTHORS

A very well documented experimental work with a detailed methodology on a topic of increasing in both scientific and public interest. The experimental scheme is presented with a specific order that enable its repetition and reproduction, facilitating the assessment of the comparative results that justify its conclusions I suggest the authors consult my research entitled "Energetic Death", presented at the INAIT-2019 Congress at Oxford University. Said work is is aligned with the concepts of apoptosis and necroptosis and covers the in vitro section related with currently asked questions about mechanisms of cell signaling to subdue apoptosis or proliferation. Dr Adriá Angel Inchauspe
