SPECIFIC COMMENTS TO AUTHORS

This is a concise and informative paper about genetics of IPEX syndrome written with an excellent command of English. I have a few comments about it. #How many mutations have been reported so far about IPEX syndrome? The presently discovered mutation is the 3rd, or 4th, or 10th, or whatever? Please make a table showing every mutation of IPEX syndrome reported so far, including the present one. #There are a few careless grammatical mistakes: ex. Figure 1, figure legend: the point inside the circle indicate> the point inside the circle indicates. Please proof-read the Ms again.
