SPECIFIC COMMENTS TO AUTHORS

well written manuscript. i have few suggestions. 1- how is the follow up of patient?
2-(<https://doi.org/10.1111/tbj.13174>) and (DOI: 10.21802/gmj.2019.2.11) I suggest
both of these uptodate studies for the references.

SPECIFIC COMMENTS TO AUTHORS

This is a nice 'documentary' report on a patient with severe periodontitis treated with a staged bone load-bearing therapy via temporary implants. The manuscript is generally well-written with a good command of English. I have a few comments. #1 The point of this case report, according to what I understand, is the use of 'temporary implants' in addition to the classic methods, all-on-4 implant and/or zygomatic implant, right? What I want to suggest is to review previously reported similar cases treated with 'temporary implants' and to make a comprehensible table showing the patient (age, sex), disease (entity, disease duration), radiological features, treatment procedures, prognosis (outcome), etc. By this way, the readers can understand the superiority of this method and compare this particular case with other cases. At the end of Discussion, it lists up 4 items as 'conclusion indication for stage implant loading'. Although this particular case was described in detail in this paper, the readers cannot understand why that kind of generalized statement could be possible just because of this case being given here. This is why I think it necessary to include a review in this paper. #Abstract, background: This is just like a 'case summary'. This should be primarily about general comments about 'staged bone load-bearing therapy' and/or 'temporary implants'. #There are a few potential grammatical errors throughout the text: ex. -FINAL DIAGNOSIS: periodontitis disease>>> periodontitis -Discussion, last line: Necessary>>Necessity -etc.
