SPECIFIC COMMENTS TO AUTHORS

Dear editor and authors, The authors reported with few cases to illustrate a common condition. Although they described the cases in details, the paper neither lacks novelty nor described an unexpected unique presentation to the existing medical literature. Regarding the descriptions of the cases, I recommend the authors to clarify: □ Etiology of case 1: muscle pain & osteoarthritis of joint; case 6: myositis & osteoradionecrosis. What really makes the large differences between the 2 cases? □ Etiology of both cases 2 & 3 are related to dental problem. What really makes the large differences between the 2 cases? On the other hand, the manuscript has some merits regarding the proposed issue. I encourage the authors to expand, restructure and reorganize their manuscript to upgrade it to a review article to summarize the current state-of-the-art understanding of the topic.

SPECIFIC COMMENTS TO AUTHORS

This is a report of a few cases of orofacial pain around the zygomatic area. The truth is this article does nothing to improve the existing knowledge of orofacial pain, and zygomatic area is just a small part of the whole maxillofacial region. Having said that, this manuscript does illustrate to the readers how the various causes of orofacial pain could be diagnosed, and for that reason I'd recommend publication of this manuscript in the World Journal of Clinical Cases.
