The present manuscript showed the effective treatment with patient's own pedicle flap placement in a patient with esophageal fistulas in diverticulum. The topic is interesting and manuscript well written. However, there are some concerns to be clarified. 1. Follow-up period is short. Please, provide management and clinical course after first follow-up endoscopy. 2. It is difficult to know procedure methods in detail and improvement of fistula with figure 1 d to e. More clear photos would be helpful for the readers.
