SPECIFIC COMMENTS TO AUTHORS

The case report “Reduced delay in the diagnosis of keratocystic odontogenic tumor with malignant transformation: a case report” mainly focused on PIOSCC, which was transformed from KCOT in rare cases. In this report, the authors report a case of malignancy derived from KCOT with five days-delay in diagnosis to take a closer look at PIOSCC. However, Authors must understand that a case report is not the one which highlights a rare condition but the one that has a clear message that can be generalized, and is relevant to many other clinicians. It is a topic of interest to the researchers in the related areas but the paper needs very significant improvement before acceptance for publication. My detailed comments are as follows: 1. On the section of Imaging examinations, too few description about images is given here. Instead, the authors may provide more accurate description about images. 2. As the key to the diagnosis of PIOSCC, the description of pathological features in this part is not detailed enough. 3. Most of the content on Discussion section is similar to that on Introduction section, without in-depth discussion of the cases, KCOT or PIOSCC. Here the authors should give information about the condition or intervention in question, such as the basic epidemiology, pathophysiology, clinical presentation, investigations, and treatment. It is extremely important for authors to show how your case differed from the norm and how this is contributing to medical understanding.

SPECIFIC COMMENTS TO AUTHORS

Title: The nomenclature of 'KCOT' was changed to Odontogenic Keratocyst in the last WHO consensus. KCOT should be changed as OD in the title and throughout the text.

Abstract: Line 24-25: The clinical and radiographic data are needed to diagnose the case as KCOT. Radiographic data about the case should be presented in this section.

Discussion: In the last paragraph, the information about treatment is unnecessary. The summary paragraph should be concise and comprise the main idea of the manuscript.
