SPECIFIC COMMENTS TO AUTHORS

I read the article carefully. CMV infections after transplantation is not rare a condition. Treatment of this infections can be difficult. In this paper authors want to publish a case who treated successfully after transplantation. It can be considered for publication.

SPECIFIC COMMENTS TO AUTHORS

Case report of treatment resistant biliary atresia with detection of CMV in bile but not serum or liver biopsy IHC in baby with liver transplant. Upon ganciclovir treatment biliary stasis was reduced and liver transplant was functioning normal. No real issues. Good English.
