#### **SPECIFIC COMMENTS TO AUTHORS**

Dear authors, your case report represents very interesting data about rare type of ovarian carcinoma. As described case is a rare condition, this case report would be interesting for the readers. Information about patient consent to publish data is necessary. As per my opinion authors should include more information about patient, especially gynecological history, including menstrual and contraceptive history, concomitant diseases (if any). There are some syntax errors and misspelling throughout the paper. As the case is rare and interesting, this case report may be published after the correction.
