SPECIFIC COMMENTS TO AUTHORS

1. The table should provide some details related to clinical features 2. Figure 1 is unnecessary 3. Figure 2 needs a detailed description. How the CT images present different information on different time points. 4. The manuscript can be benefited from revisions for grammer and clarity of sentences

SPECIFIC COMMENTS TO AUTHORS

Overall: 1) The manuscript will benefit from some language “polishing”, including improvement of English grammar and expressions, e.g. “cross the world” instead of across the world, “this type cases”, “had fevered with irregular heat type”, etc. Abstract: 2) 2nd sentence from the abstract – mechanism of what? Please be more specific. Case presentation: 3) Importantly, what SARS-CoV-2 tests were carried out to make the diagnosis and after that to conclude the COVID-19 convalescence phase? Please refer to the method, kits type, and type of testing. From the written, it seems that the diagnosis is based on "fever, cough and fatigue". 4) Comorbidities should be given. 5) Each case should be assessed separately including the important points of CARE checklist. Start with Patient A and include all relevant information: symptoms, history, clinical findings, tests, imaging methods, diagnosis, and therapy.
