SPECIFIC COMMENTS TO AUTHORS

this topic is interesting, but some comments are highlighted below: 1-I think the last 2 years i.e 2019, 2020, there is a difference in favor of studies published in china. 2-impact factor is not good indicative of journal quality. 3-some sentences isnot understood, please rewrite them 4- language editing need polishing (some of them in the uploaded file)

SPECIFIC COMMENTS TO AUTHORS

The study is undertaken to evaluate the clinical trials of randomized controlled trials of colorectal cancer all the world over the past decade. It is an interesting study that provides evidence on this subject, especially on the countries and universities organizing such trials and on the journals publishing them. However, it is suggested to the authors either to reconsider the aim of their document or to remove (or revise) all comparisons of China with the rest of the world (abstract and discussion). There are also some typo/grammar errors requiring correction before the m/s is being accepted for publication. 1. Page 1, line 17: Replace “has” with “have”. 2. Figure 3: Correct x-axis legend and replace the name of England with “UK”. 3. Table 1: Correct the name “English” (two times) in second column with “UK”. 4. Table 2: Correct the name “English” (eleven times) in fourth column with “UK”. 5. Page 1, line 33: Write the names of the researchers with the initial letter capital.

In the revised form of the m/s, the authors have followed some of the reviewers' suggestions, especially regarding the emphasis given in m/s to Chinese clinical trials. However, reconsidering the aim of the study usually results to title revision, but the title of the revised form of the m/s is not clear. As the title is written in the revised form, it seems that the name of an author is included in the title. In addition, as it is written in the aim of the revised form, the study provides suggestions for conducting Chinese RCTs of colorectal cancer. However, there are no substantial changes in discussion section of revised form, or anywhere throughout the m/s. The authors should be more focused to the aim of their m/s and to organize the text accordingly, otherwise the m/s cannot be accepted for publication.
