SPECIFIC COMMENTS TO AUTHORS

Dear author, The manuscript entitled “Long-term remission after Chidamide combined with chemotherapy and single-drug maintenance therapy in hepatosplenic T-cell lymphoma: a case report” is well written. Comments, 1. What is the median survival for the hepatosplenic T-cell lymphoma patient from previous reports? This data should show in the introduction part. 2. The data of the Chidamide should be briefly showed in the introduction part. 3. The author should show more data in the outcome and follow-up part. including, a. What is the management after lymphoma progression? b. How progression of the disease? c. What is the exact cause of death? According to the data, the patient died only one month after disease progression from about 9 months of remission. This time interval seemed to be relatively short. Thus, is there any possibly occult disease in the nine months period?
