SPECIFIC COMMENTS TO AUTHORS

The manuscript described that the mass was diagnosed by FNA with subsequent HE stain and immunohistochemistry. Usually the specimen obtained by FNA is of little amount, please confirmed if the tumor was diagnosed by core needle biopsy or FNA. Discussion: a male:female ratio a male to female ratio References: Majority of the topics in references are smaller case except for the first letter or special term. But the topic of reference # 6 and 11 are not. The authors are obliged to make it consistent in format and meet the requirements of the journal. Figure and legend The last arrow of figure 1D should be pleura. Figure 2. intens intense
