

## PEER-REVIEW REPORT

**Name of journal:** World Journal of Clinical Cases

**Manuscript NO:** 51085

**Title:** Pathogens causing diarrhoea among Bangladeshi children with malignancy:  
Results from two pilot studies

**Reviewer's code:** 00722239

**Position:** Editorial Board

**Academic degree:** MD, PhD

**Professional title:** Associate Professor

**Reviewer's country:** Japan

**Author's country:** Bangladesh

**Reviewer chosen by:** Le Zhang

**Reviewer accepted review:** 2019-11-09 20:48

**Reviewer performed review:** 2019-11-10 17:15

**Review time:** 20 Hours

The authors have investigated the pathogens causing diarrhea among Bangladeshi children with malignancy through two pilot studies. Although their findings lack novelty, I believe this study has epidemiological and regional importance and clinical implications. As the authors have documented as limitation, the sample sizes are small and the methodologies are different between two studies. However, this study is useful for Bangladeshi children with malignancy to provide etiologies of diarrhea and inspire further research. The manuscript is relatively well-written.
