what indication did the patient get listed for a Liver transplant? -Abbreviations (like G test) to be expanded -Details of the Liver graft function on Doppler not mentioned -There is confusion regarding whether the imaging was MR or CT (image is CT, but in the manuscript it is referred as CT) -The legend for fig 1 does not contain the appropriate description -With a GCS of 6 on post op day 19, the delay in intubation is perplexing (as per manuscript, intubated on day 20) -Drug dosages (Methyl prednisolone, Tacrolimus, etc) do not find a mention throughout the manuscript -As Jap Enceph is not a usual screening viral agent for Transplant, it may not be considered as a limitation -There is no conclusion available
