please delete 'paralysis of the common perineal nerve' as it was only a sensory component that was damaged most likely due to the surgical procedure

SPECIFIC COMMENTS TO AUTHORS

The title is referring directly to the problem at hand. The abstract is sufficient

Introduction is adequate and explanatory. You report a rare case of checkrein deformity following fibula osteotomy, for autogenous fibula grafting. Case Presentation: is referred to "A 28-year-old female that she had undergone "resection of ameloblastoma at the right mandible, mandibulectomy, and autogenous right fibula grafting". Treatment: The patient refused surgical treatment. The course of the comprehensive rehabilitation therapy was 20 days that include a number of treatment modalities. Outcome and follow-up: Improvement was generally stabilized at three and six months after discharge, no pain was reported at six months after discharge and the dorsal flexion angle of the right ankle did not change at three and six months after discharge. For the treatment efficacy assessment, the visual analogue scale (VAS) was used and for the Gait analysis a digital running table. Discussion: You point out that Checkrein deformity is a movable flexion deformity. You are the first that report a case of checkrein deformity following fibula osteotomy and complications following fibula osteotomy are generally neglected. The effectiveness of the comprehensive rehabilitation on the lysing of the muscle belly of flexor hallucis longus is limited and surgical treatment could be conducted if necessary and no relapse of the toe pain was reported during the follow-up at three and six months after discharge, and the daily walking of the patient was not affected. You Conclude that "These findings demonstrated that rehabilitation therapy has important value in conservative therapy, as well as postoperative therapy of checkrein deformity." References: You have included 9 papers that support your views. Illustrations: 3 tables and 2 figures are included. Limitations: Short follow up of the case.
