SPECIFIC COMMENTS TO AUTHORS

The prevalence of non-alcoholic fatty liver disease(NAFLD) increases with cardiometabolic diseases.Crosstalk between NAFLD and coronary heart disease is a getting more and more attention topic.So this review is complex and useful for understanding in this field. Suggestion:More cross impact of medical interventions between NAFLD and CVD should be appropriately supplemented.

SPECIFIC COMMENTS TO AUTHORS

First - in this review a detailed evaluation of the relationship between NAFLD and CHD was performed. Second - the conclusions appropriately summarize the data that this study provided. Third - recommendation to conduct randomized, long-term studies.

SPECIFIC COMMENTS TO AUTHORS

Dear Authors, the paper you submitted appears well written and summarizes the close relation between Nafld and Chd. The limited clinical interventions available limit the interest to the topic. Best regards
