#### **SPECIFIC COMMENTS TO AUTHORS**

Dear authors, I have a few comments on your manuscript: - You keep the patient's diagnosis top secret. The diagnosis "a major neurocognitive disorder" is very vague. Would you kindly more specify the diagnosis (e.g. Alzheimer's disease, vascular dementia etc.)? - You write that the patient was originally treated with risperidone and quetiapine. Was it in the form of pills or a solution? - In "Physical examination" you write "Both lungs were clear". Do you mean auscultation or radiological examination?  
The reviewer
