SPECIFIC COMMENTS TO AUTHORS

I read the manuscript named " Perianorectal abscesses and fistula due to ingested jujube pit in infant-2 cases: case report and literature review. ". (Manuscript NO: 56801). I read the manuscript and my recommendations are as follows. Title: It is accurately reflects the major topic and contents of the study. Abstract: Adequate, summarizing the topic. Case report: Cases has been presented in detail. Topics has been discussed with all aspects. References: References are appropriate and updated. Figures: Figures are reflects the major findings of the study, and they are appropriately presented. This manuscript was well-written and documented. This study is clearly presented . Most of rectal foreign bodies are introduced through anus; however, sometimes, a foreign body is swallowed, passes through the gastrointestinal tract, and is held up in the rectum, and can cause of various complications. The authors presented an unusual cause of perianal abscess and fistula in children. This situation should always be kept in mind in children. This manuscript gives additional new knowledge to the existing literature. I think that this manuscript is suitable and worth to be published in the World Journal of Gastroenterology.
