SPECIFIC COMMENTS TO AUTHORS

The article could be improved with better descriptions in every section. Few articles have reported similar conditions of heterogeneity of scleritis and its misdiagnosis, improving details could lead to a more useful tool for clinical practitioners. You can enrich your introduction/discussion with other similar papers. Also, another laboratory assesment could be performed to aid in diagnostics, these should be included, if not performed at list mentioned. This improvement can also give this paper a higher impact on readers.
