SPECIFIC COMMENTS TO AUTHORS

The manuscript describes a single center experience in managing magnet foreign bodies ingestions. It is well written and well structured and presents interesting clinical cases.

I think could deserve a publication on the Journal.

SPECIFIC COMMENTS TO AUTHORS

The manuscript (number: 58972) entitled "Surgical experience of multiple magnets ingestion in children: A single-center study" has been reviewed. 1. Title is reflect the main subject. 2. Abstract section is sufficient. 3. Keywords are reflect the focus. 4. Background is adequately. However the purpose of the study should be stated in the introduction. 5. Methods section is well designated. 6. The results section contains information about surgical procedures. 7. Although the discussion section is sufficient, it should be shortened by focusing on the purpose. Much literature information is included. The article should be focused on the fact that strong magnets can cause perforation in almost 75% of multiple purchases. In my opinion, laparoscopic procedures do not have much place. 8. Tables in the manuscript are sufficient. 9. References is appropriate. 10. Manuscript is well organized.
