SPECIFIC COMMENTS TO AUTHORS

The authors reported entitled “Uterine rupture in patients with a history of multiple curettages: Report of two cases”. In my honest opinion, the whole manuscript is written-well. The topic is interesting which is very crucial in Obstetrical emergencies. I believe that this paper will attract the readers’ attention. However, I have some concerns;

1. Did you inform patients regarding radiation exposure during CT? In addition, did you use any protective plates (lead plate) to minimalize x-ray to the fetus? 2. I strongly recommend referring attached manuscript to potentialize and support the evidence and the importance of the topic from authors. (Uterine rupture in pregnancy after robotic myomectomy. Turk J Obstet Gynecol. 2015;12(3):188-191. PMID: 28913067) 3. I would like to ask to re-review after revisions before publication. Sincerely.
