SPECIFIC COMMENTS TO AUTHORS

This manuscript reported a very rare case of primary malignant melanoma of the lung with literature review. I think this case is reportable and is a well-written manuscript.

SPECIFIC COMMENTS TO AUTHORS

The authors reported a case of primary pulmonary malignant melanoma and this case report is very interesting. As a reviewer, I have two requests if possible. #1 As the authors mentioned, an immunohistochemical staining with Melan-A seems to be important in the diagnosis of melanoma. Thus, the authors had better provide an immunohistochemical result with Melan-A, if possible. #2 How many case reports have been published until now? If not so many, the authors had better provide a table of literature review to make the readers to understand primary pulmonary malignant melanoma comprehensively.
